Hiring Manager,
JUMO
Nairobi Office

Dear Sir/Madam,

I am gratified to be applying for the Jumo for the position of Software Engineering in your company. After reviewing your job description, it's clear that you're looking for an enthusiastic and self-driven applicant with the knowledge in backend development and some part in the front end too. Given these requirements, I believe that I am able to deliver as expected and I have some not all the skills required but I am self-motivated and can learn what I don't know by in order to deliver as expected.

I am a proactive BSc. Software Engineering awaiting for graduation from Multimedia University of Kenya. During the course of my academic career, I managed to accrue nearly three years of work experience with mostly backend development in Python, Javascript and PHP, and also Elixir and Phoenix after school. I apply problem-solving and creative thinking skills, which I hope to employ into the development team at your company.

I will be glad for your response after reviewing my resume. Please contact me at +254708067459 or via email at omambiadauglous@gmail.com to arrange for a convenient meeting time.

Thank you for your consideration,
Sincerely,

Omambia M. Dauglous
